

A close-up photograph of a dark glass bottle tilted, pouring a vibrant red liquid (wine) onto a grey, textured rock surface. The liquid is captured mid-pour, creating a dynamic splash and a continuous stream that flows down the rock. The background is a bright, slightly hazy white.

VULKAANWIJNEN

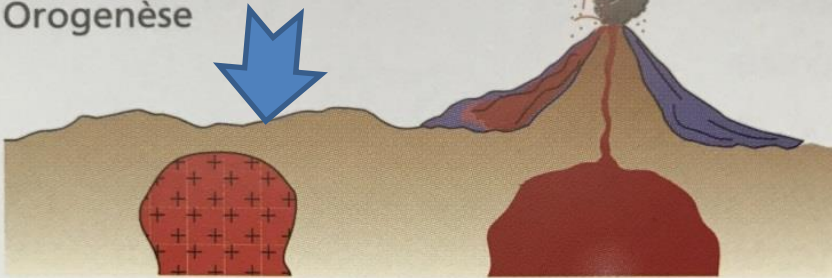

Onze Rode draad voor de degustatie...

HOE ONTSTAAN VULKAANGESTEENTEN ?

Stolling van magma in de aarde (intrusieve gesteenten) vb. Graniet

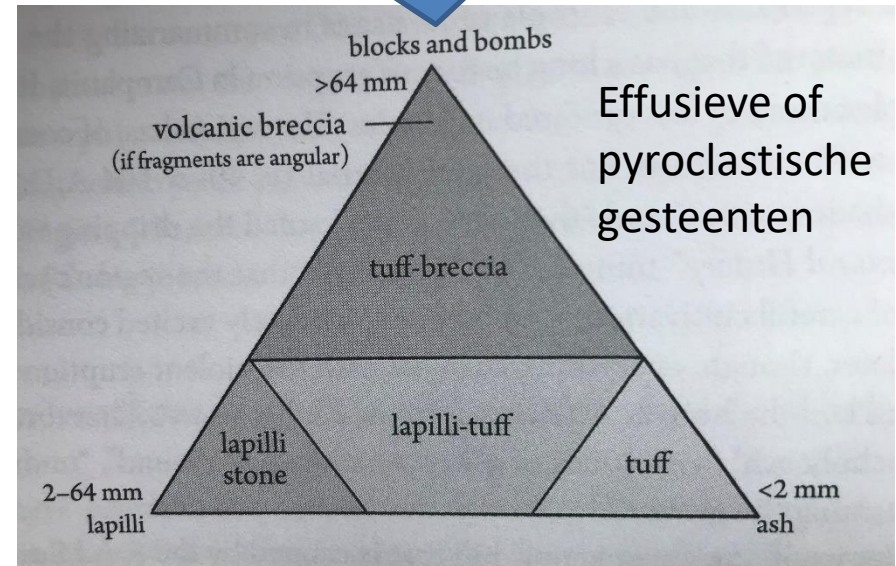

Orogenèse

Après érosion

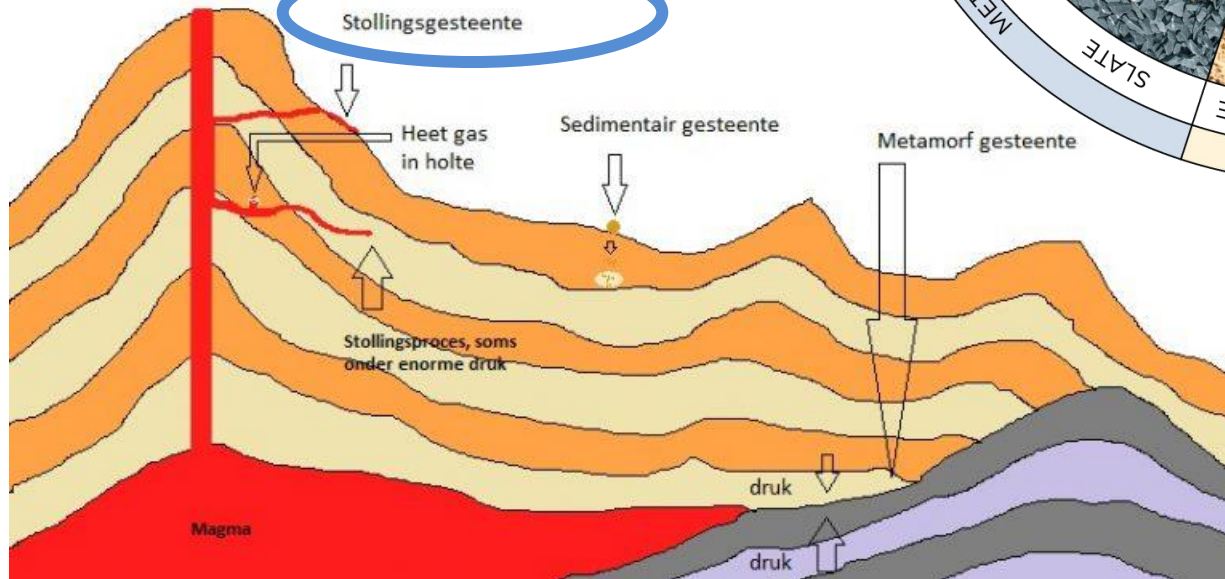

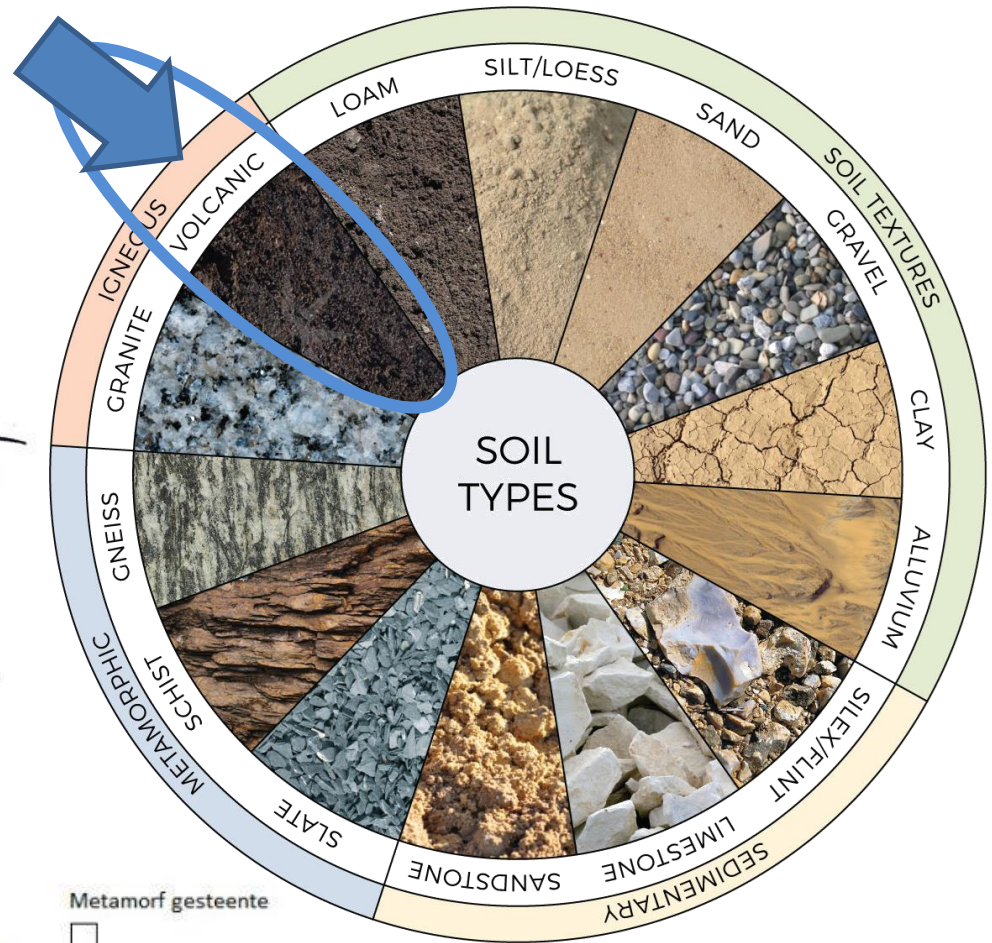

-  Croûte terrestre
-  Roches métamorphiques
-  Granites
-  Roches volcaniques

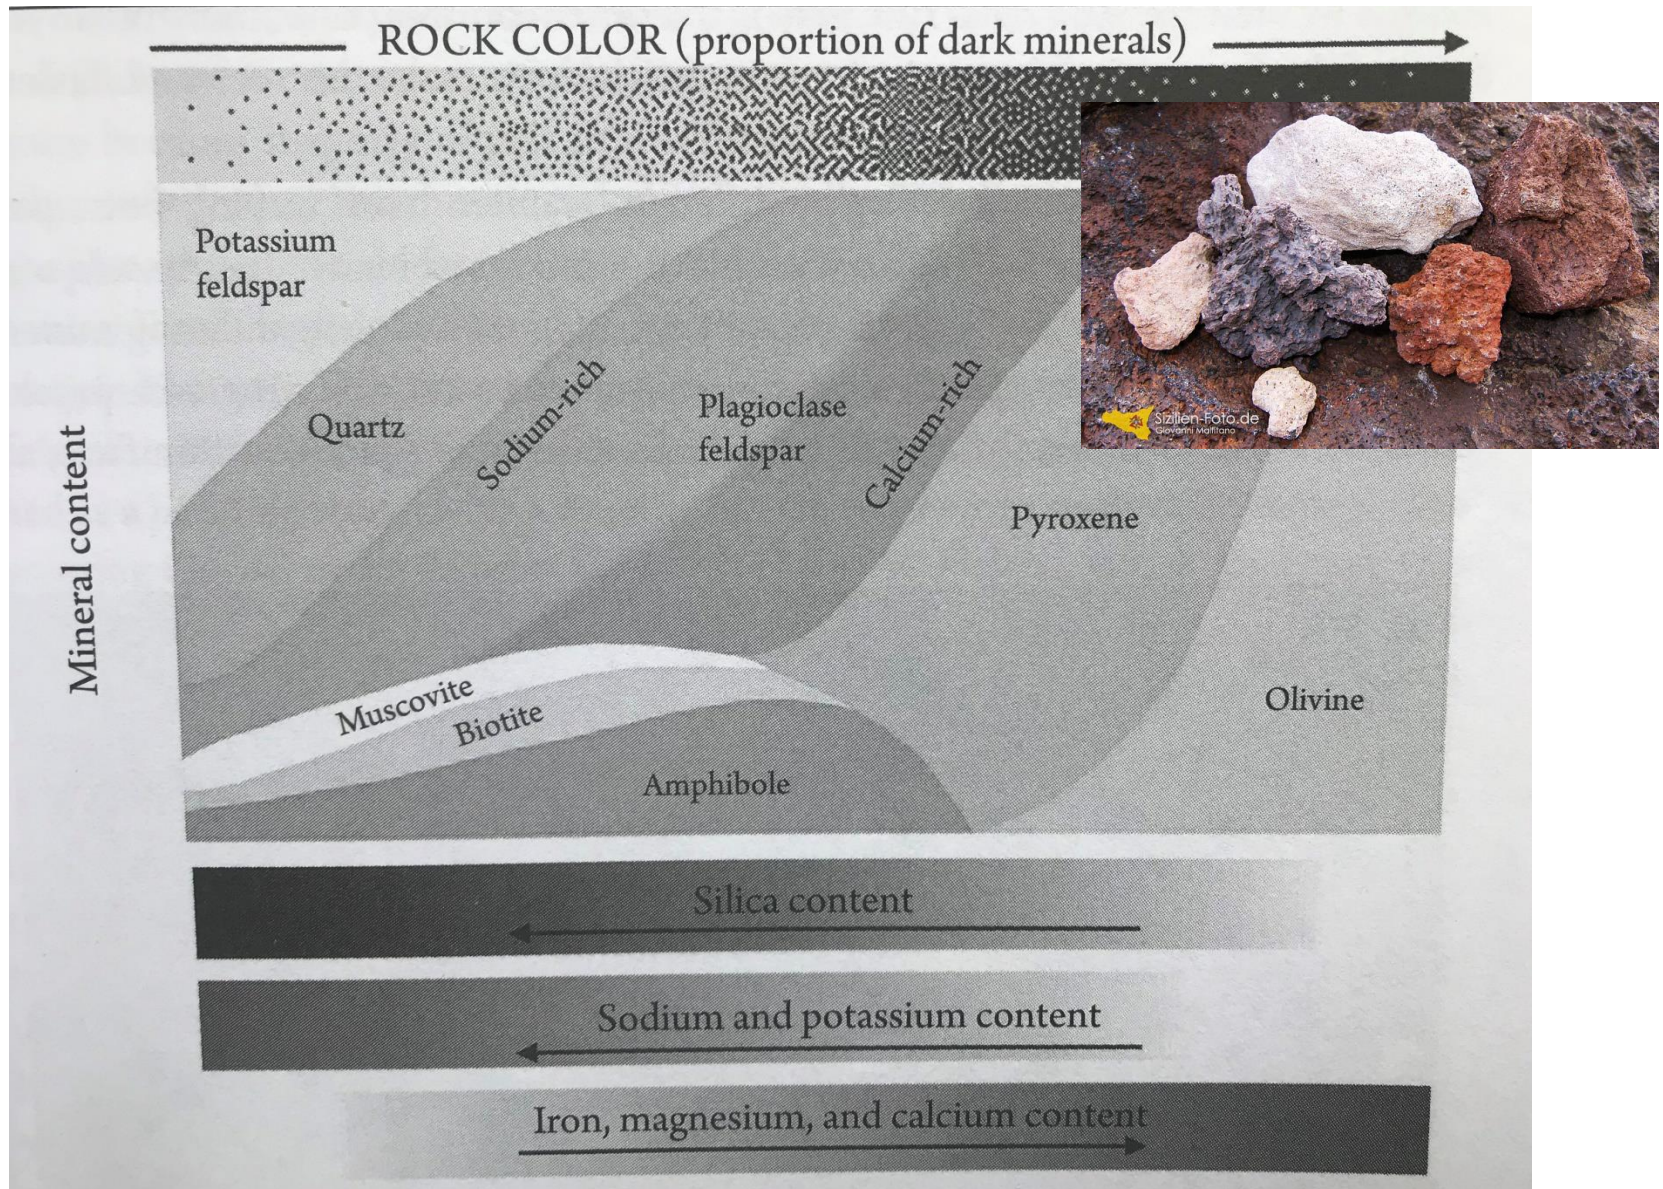

Uitvloeiingsgesteenten
Ontstaan door stolling van lava
(Extrusieve gesteenten)

AFBAKENING BEGRIP

... MAAR TOCH NOG HEEL DIVERS !!!

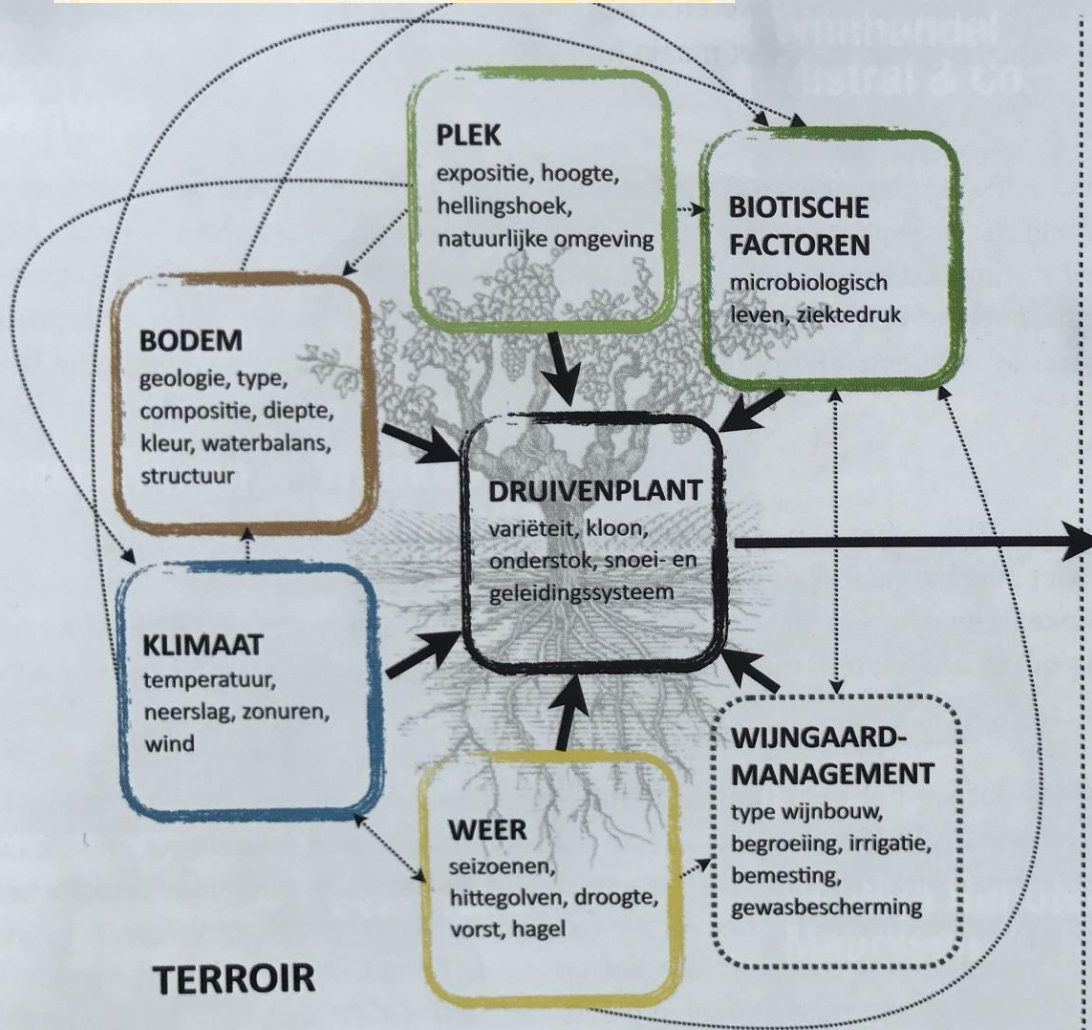

DE SYNTHESE VAN ALLE ELEMENTEN

← ZUURTEGRAAD (pH) →

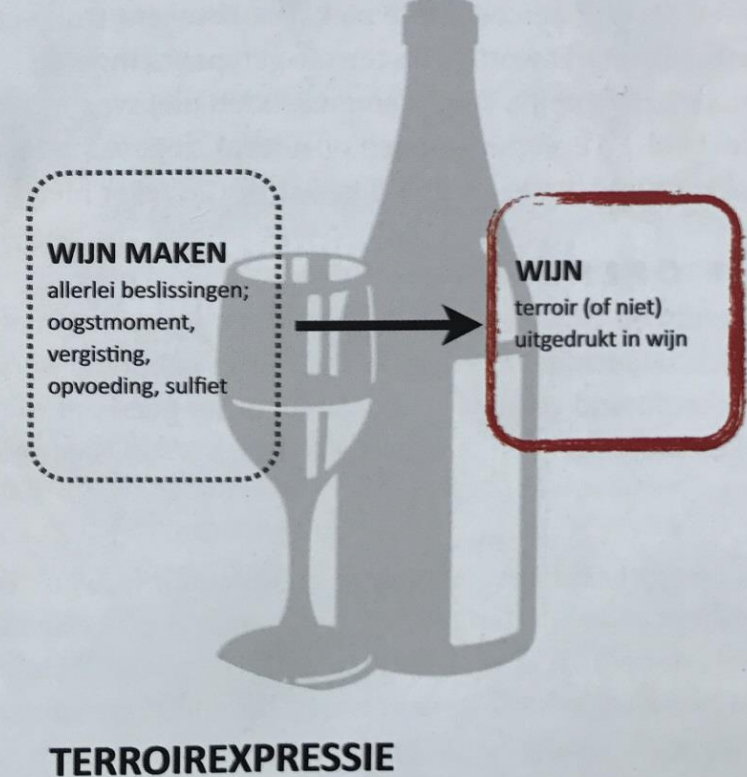

MINERAAL
SAMENSTELLING

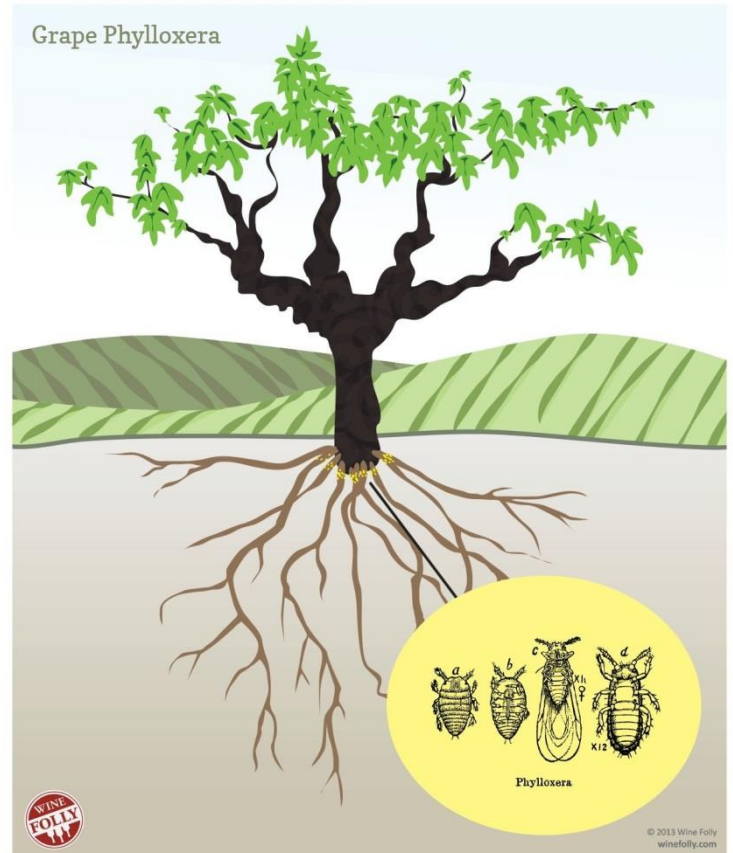

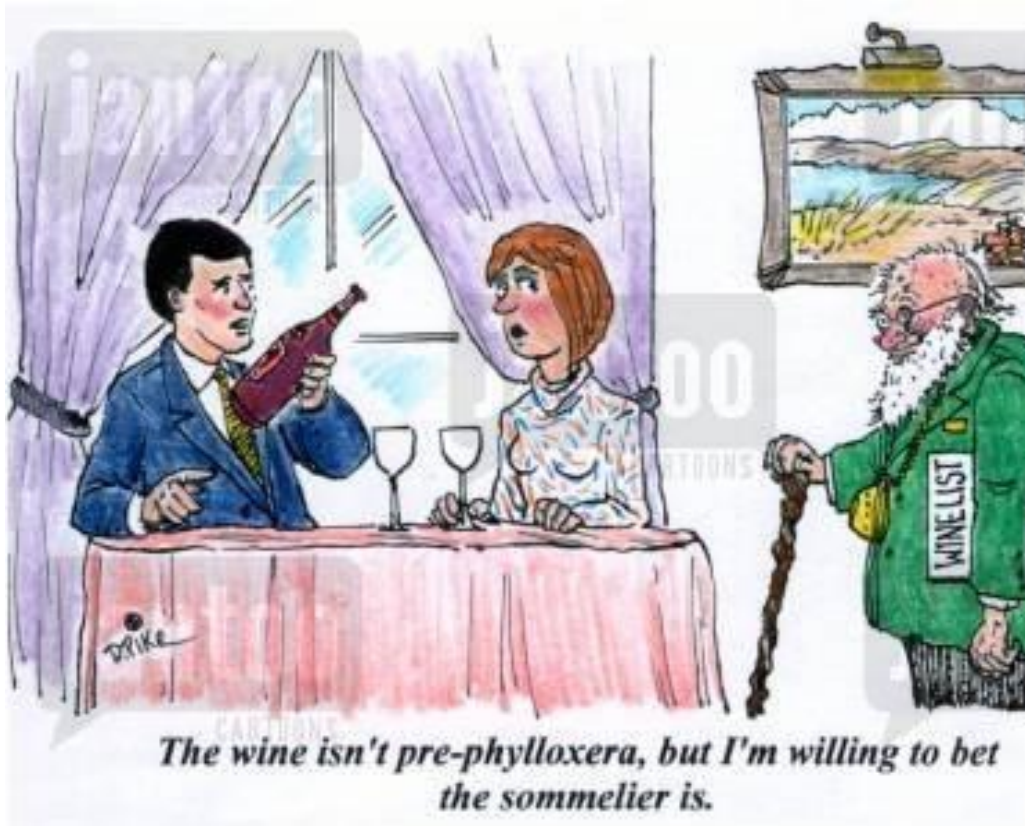

KORREL
GROOTTE

	FELSIC (ACID)	INTERMEDIATE	MAFIC (BASIC)	ULTRAMAFIC
Main minerals	Quartz Potassium feldspar Sodium-rich plagioclase feldspar	Amphibole Sodium and calcium-rich plagioclase feldspar	Pyroxene Calcium-rich plagioclase feldspar	Olivine Pyroxene
Minor minerals	Muscovite Biotite Amphibole	Pyroxene Biotite	Amphibole Olivine	Calcium-rich plagioclase feldspar
FINE GRAINED	RHYOLITE Roter Hang	Rangen de Than ANDESITE Etna	Kaiserstuhl BASALT Etna Soave	PERIDOTITE
COARSE GRAINED	GRANITE	DIORITE Côte de Brouilly	Corbières GABBRO Muscadet	

That may be what the wine glossary says, but to me, terroir means a fantastic view.

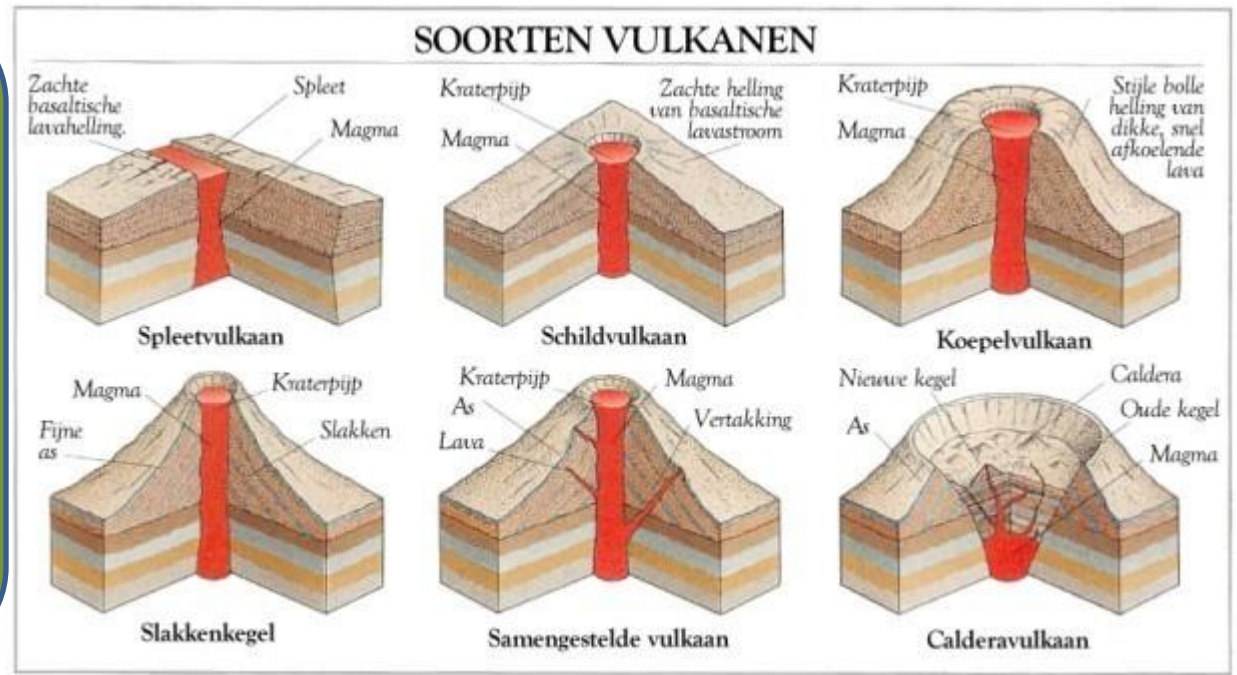

Poreusheid van de bodem betekent veel zuurstof in de bodem, daar houdt de druifluis niet van en dus kom je relatief snel veel oude, wortelechte planten tegen in vulkanische terroirs.
